14. Git status

The screenshot shows the Visual Studio Code interface with a terminal window open. The terminal displays the output of the `git status` command, indicating that the working tree is clean and the branch is up to date with `origin/main`. The Explorer panel on the left shows the project structure, including `KLH-CSE-2026-27-2420030539`, `Abstract(Team-08).pdf`, and `README.md`. The Chat panel on the right shows a session with the AI agent.

15. Push the files using git push.

The screenshot shows the Visual Studio Code editor interface. The Explorer sidebar on the left shows a project structure with files: `Abstract(TEAM-08).pdf`, `index.html`, and `README.md`. The main editor area displays the `index.html` file with the following content:

```
1 <h2> ASE Project
2 </h2>
```

The integrated terminal at the bottom shows the execution of the following git commands:

```
bash - KLH-CSE-2026-27-2420030539
ykran@KRANTHI MINGW64 ~/Desktop/git/KLH-CSE-2026-27-2420030539 (main)

The right sidebar contains a CHAT panel with a message: "Tip: Use /init to generate or update a workspace instructions file for AI coding agents." Below this is a section titled "Describe what to build" with a list of items: `+ index.html`, `+ Agent`, `+ Auto`, and `+ Default approvals`.

16. Check the commits on GitHub.

Outcome:

Successfully learned how to create Git commits and upload a project to GitHub.
